Mr Nigel BRUCE

Horizontal Integration of the Medical Curriculum in the Chinese University of Hong Kong using Concordance Based Indexing for Cross Referencing and Curriculum Mapping.

CDG 2012 - 2013

The brief project outline:

(1) Q1 and Q2 : create concordance using propriety software programme

(2) Q3 : in conjunction with year co-ordinators Y1 - Y5 and other panel

coordinators identify parts of the current curriculum which are included

in the concordance index.

(3) Q4 : identify key topics and teachers and prepare sample videos for inclusion

into a Faculty wide teaching resource.

English

 A language based on the highest level of abstract symbolism.

Alphabet of 26 characters (5 vowels, 21 consonants) giving rise to over one million words

HOUSE =

Chinese

 A language based on lower order pictorial symbolism of entire concepts.

 Around 3-400,000 words; 47,000+ characters of which around 43,000+ are redundant

• 房(house)=户+方

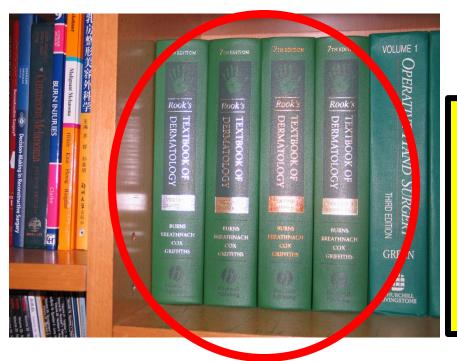

English

- Characters
- Words
- Sentences
- Grammar
- Punctuation

- A, b, c,
- Bat, ball, student.
- The cat sat on the mat.
- The mat, sat, on the cat.
- The cat, sat.

Corpus

A collection of written works in a particular field

Rooks Textbook of Dermatology

Published by Wiley Blackwell

Over 8 million words.

Laurence Anthony

Professor (Mathematical Physics)

Center for English Language Education in Science and Engineering (CELESE)

Faculty of Science and Engineering

Waseda University, Tokyo, Japan

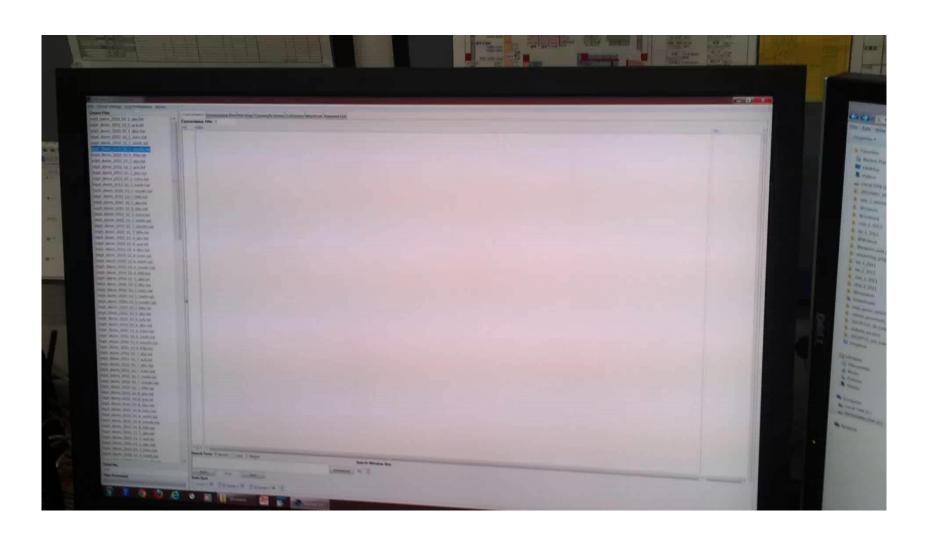

One of the world's leading experts in corpus linguistics

Progress

Laurence and I have signed a legally binding contract with Wiley Blackwell to access the electronic data files of the Rook's Textbook of Dermatology

First such project by WB — a win-win

Searching a corpus

Next Step(s)?

1. Mine the corpus

2. Develop a list of key terms

3. Search as much of the curriculum as possible using those terms

CONCORDANCE ANALYSIS

The "Search"

 PPT presentations -- there is software to extract text from presentations

 Handouts – electronic formats better but can scan and use text recognition software

 Voice over – can use voice recognition software

Thanks
